POLYARIAN

ABOUT POLYARIAN TRADING COMPANY:

Polyarian production group is proud to offer services to various factories with years of experience in the production and trading of various types of gunny-sacks and rolls in jute bags, jumbo and plastic forms and the group is ready to supply various types of gunnysacks and rolls according to customer orders. This group operates by supplying excellent and quality products to domestic and international markets, including Iraq, Russia, Afghanistan, Georgia, Oman, United Arab Emirates, Belarus, Azerbaijan, and Africa.

Due to the variety and quality of products, the Polyarian brand is recognized as a top choice in the Iranian and global markets. It is also recommended to consider the Polyarian brand as an excellent and cost-effective option for benefiting from these products.

POLYARIAN

Most plastic sacks are made of polypropylene. These materials are widely used in the production of plastic sacks due to their high resistance and lightness.

Another type of plastic sack is made of jute fibers, known as jute woven sacks. According to the type of sacks, they are used in different industries.

Sacks are produced in various forms such as plastic sacks, jute sacks, AD STAR jumbo bags, laminated sacks, and shell sacks.

The applications of plastic sacks include:

The storage of food such as rice

Fruit storage

Dry fruit storage

Agriculture

Chemical industry

Construction industry

Pharmaceutical industry

Textile industry

POLYARIAN

Sack production with the best raw material

Polypropylene is used in various industries due to its special properties such as lightness, flexibility, impact and heat resistance, easy formability, and low production cost.

To achieve the best plastic sack, using advanced technologies and high-quality materials, conducting precise and continuous quality testing and control, designing and developing optimal production processes, and creating effective interaction with suppliers are among the actions that must be taken to produce high-quality plastic sack.

POLYARIAN

Plastic sacks are produced in various dimensions. Additionally, esteemed customers can order customized sacks with the following features:

- Desired dimensions
- Desired quantity
- Material selection
- Design selection for printing on the sack

POLYARIAN

Plastic Sack Products

Plastic sacks are made from materials such as polyethylene with a soft and flexible surface, making them easily adaptable to various needs. This product is used in industries such as packaging, construction, automobile manufacturing, and even the food industry. The diverse applications of this product demonstrate its ability and efficiency in facing different pressures.

Polypropylene plastic sack

Polypropylene sacks have a wide range of uses in transporting sand, gravel, cement, and agricultural purposes. Important features of these bags include high resistance, non-toxicity, ease of molding, and reasonable price. Polypropylene bags are produced in single or multiple layers in dimensions and thicknesses according to customer orders. For packaging items weighing more than 25 kilograms, using polypropylene bags is a suitable option. Polypropylene, also known as PP, is biodegradable, which is one of its distinguishing features.

POLYARIAN

Plastic sack roll

Plastic sack rolls made of high-resistance polypropylene in plain and laminated types. The use of polypropylene rolls in producing plastic sack has led to increased strength. Nowadays, polypropylene plastic sack rolls are widely used in the production of various polypropylene bags and jumbo bags.

Custom orders for plastic sack rolls in different colors and dimensions are possible in desired quantities. Various thicknesses of threads are used in the production of plastic sack rolls.

POLYARIAN

Laminated Rolls and Sacks

In laminated rolls, the weaves are covered by a thin layer (around a few microns) of a combination of 95% P.P and 5% PE, blocking the pores present between the threads of ordinary fabrics in these types of polypropylene rolls.

Due to the reasonable price and high strength of these rolls, in addition to their use in producing various polypropylene bags and jumbo bags, these types of bags have a wide range of applications as covers and packaging for many other products.
